Downers Grove Park District
April 17, 2014

<p style="text-align: right;">5</p> <p>1 MS. RANK: Mr. Cushing? 2 PRESIDENT CUSHING: Aye. 3 MS. RANK: Ms. Mahoney? 4 TREASURER MAHONEY: Aye. 5 PRESIDENT CUSHING: Motion is approved. 6 On TO our Action Items. 7 EXECUTIVE DIRECTOR McADAM: We do not have any 8 Action Items this week, but we will make up for it next 9 month. We have already got quite a list. 10 PRESIDENT CUSHING: Very good. We are on to 11 Board Business. President Comments is first. I do not 12 have any comments. Happy Easter to everybody and 13 welcome spring. 14 Does anybody have anything they would 15 like to add to that? 16 COMMISSIONER SOUTER: I have a few words. I 17 had the opportunity to attend the Passport to Safety and 18 Wheely Big Trucks event. I happened to be there on 19 behalf of my mortgage job, but I had a chance to kind of 20 take a look at everything. I was really impressed how 21 well it was run. It was a great crowd. It seemed like 22 everyone was having a great time inside and outside. I 23 want to congratulate the team for putting that 24 together. Nice job.</p>	<p style="text-align: right;">7</p> <p>1 coming. 2 Also in the packet this evening, I think 3 it was probably the first page, is a New Event 4 Schedule. The thing Commissioner Mahoney had asked 5 about, being able to know different events in the 6 community that might be appropriate for the Board to 7 know about as well as events like Passport to Safety 8 that we had, and some of those kind of things which you 9 might be interested in. So we will look at least on a 10 monthly basis to update those. The last column on there 11 would indicate we are looking for a response. 12 Otherwise, it's just for information. So if there is 13 events that you think may be of interest to the Board, 14 just let me know and we will make sure we will get those 15 on the sheet, too. 16 And finally, in the next two weeks, the 17 next Workshop Meeting will be the Operations & Planning 18 Department Budget Presentation as well as Finance will 19 be presenting the budget draft to you. And again, that 20 will be just getting us through the end of the year as 21 we change our fiscal years. 22 I would be happy to answer any questions 23 you might have. 24 TREASURER MAHONEY: When do you think the</p>
<p style="text-align: right;">6</p> <p>1 PRESIDENT CUSHING: Right on to Staff 2 Reports. 3 EXECUTIVE DIRECTOR McADAM: Thank you. I just 4 have a couple items for you. In the packets before you 5 this evening, there is a copy of the new website draft, 6 the front page, just for you to take a look at, if you 7 have any comments of the draft. I wanted to give you an 8 idea where we are heading. We are really pleased with 9 what is being put together. It's nice and clean. You 10 can see that we have a focus piece and then various, 11 within the news, upcoming events, and then at the bottom 12 is quick links to our different areas, museum, golf. 13 And when we were talking about if you click on that, it 14 will take you to the other pages. So we are still on 15 trying to get that completed and coming along. It's 16 going to look real nice at the Workshop Meeting. We 17 talked about Comcast. There is number a questions that 18 the Board had, still working through those. I 19 anticipate at the next Board Meeting to have a 20 recommendation before you on that. We are still doing a 21 little bit of work on that. 22 With that same Workshop Meeting, we also 23 talked about precedents, boundaries. We are working on 24 a draft, new policy for you as well. That will be</p>	<p style="text-align: right;">8</p> <p>1 website will be ready? 2 EXECUTIVE DIRECTOR McADAM: Still on for 3 June. 4 PRESIDENT CUSHING: Questions? 5 MR. KELLY: Good evening. Since this meeting 6 is taking so long, I will keep it short. 7 COMMISSIONER SOUTER: We appreciate that. 8 MR. KELLY: All the operations at the Lincoln 9 Center and Recreation Center this month have been pretty 10 status quo. You will see that the Facility Rental 11 Revenue of the Rec. Center is up, which is a new trend, 12 as you know, a good trend as of recent past. We have 13 begun our prescribed burns. We had one at Belmont 14 Prairie on March 26th. Along with that, assisting, Jeff 15 and Mike and some people over at the golf course in 16 burying some of the prairie, the natural areas over 17 there as well. We did have a volunteer workday on 18 April 12th at Belmont Prairie, and then we had our 19 Pierce Downers Heritage Alliance Holiday Wilderness & 20 Wildflower Walk out at Lyman Woods, or will be on 21 May 3rd. 22 As an upcoming event on April 12th, we 23 opened up the miniature golf course which, 24 unfortunately, we did have to cancel the Mini Masters,</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">9</p> <p>1 which is an event that we're still going to consider for 2 future as we think that it's a viable event. We just 3 need to figure out the right way of doing that. And 4 then on Saturday, with the good weather, we did have a 5 decent day for opening day. Sunday, however, had the 6 exact opposite. We were only open for a couple hours 7 due to the weather. Then we actually are off again 8 until next weekend. We will open back up. Because of 9 the holiday weekend, we aren't going to be open. We had 10 a little hiatus with Easter. Being open later. We're 11 looking for getting on full track over there. 12 The golf course did open on April 4th 13 and, you know, I am sure you're aware with the weather, 14 hit or miss, we have had our slow start. However, with 15 some of the better days, such as last Saturday, we had 16 upwards of 170 plus rounds. Again, the ball machine, 17 more than at the driving range, is getting high use 18 already. We did open up the ball machine early. Ian 19 actually presented a video on our website, on You Tube, 20 to show how to utilize the ball machine at the site 21 versus doing limited. So people could just come and use 22 the driving range. That turned out to be a really good 23 idea. I had to defer to Bill. It was his idea. But at 24 least we got to open on the range as well.</p>	<p style="text-align: right;">11</p> <p>1 it was a good field trip for them. 2 Sports, we are moving into spring 3 leagues, outdoor leagues. All of our soccer and adult 4 softball and such is getting ready to kick off over the 5 next couple weeks. We have our Open Gym, really good 6 usage over the month of March as well, with 943 compared 7 to 894, mine being Pickleball. 8 Moving into Events, we participated in 9 the Downers Grove Wedding Walk, which was an opportunity 10 for us to market our rental opportunities throughout our 11 different facilities throughout the district. It was a 12 good turnout. We were stationed at Bally Doyle's, which 13 is the end location, where people came and submitted 14 their final tickets. So we did get some activity there 15 as well. 16 We had our Passport to Safety, as 17 mentioned, this past weekend, along with Wheely Big 18 Trucks, a captive event with the Village Police & Fire. 19 It was a great event. We estimated near 1,000 people 20 visited. It was a constant flow and really was -- 21 obviously great weather helps. It was just a real 22 positive event and everybody did a great job inside of 23 the third floor of the Passport To Safety, and outside, 24 with the trucks and the different, you know, cool things</p>
<p style="text-align: right;">10</p> <p>1 Out at the museum, we had 30 children 2 attending the American Spring Break American Girl Doll 3 Camp, which is a very good turnout for the Museum Spring 4 Break Camp. We had 58 people tour the museum last 5 month, which made it seem a lot. That was actually a 6 good number for the museum, but it's good now that the 7 weather hopefully has turned positive for this spring as 8 it continues. 9 As mentioned in the Recreational 10 Department Board Presentation, we're looking at changing 11 the hours of operation. The goal of that is -- We will 12 get this information to you in detail, but the goal of 13 that is that the exhibit, which will begin in July, to 14 kind of make it a Grand Opening, and that, with our new 15 hours, which we will have new evening hours, more 16 distinct tour hours and more distinct research hours, 17 and also will assist us in managing the total operation 18 as far as resources with people. So we will bring that 19 to you in detail. 20 Moving into Programming, we have our 21 Dance. We have 197 dancers for recital, which is up 22 from 90 from last year. Preschool registration, looking 23 real strong. The three-year-old preschool classes went 24 to the DuPage Children's Museum. So the end of March,</p>	<p style="text-align: right;">12</p> <p>1 going on. It was just a good event overall. 2 We also held our Volunteer Recognition 3 Event at the golf course, and that was a great event as 4 well. It's always nice to acknowledge all the people 5 that help us. I really can't say enough or do enough, 6 but it is at least somewhat of a nice gesture to 7 acknowledge them following that. 8 On Thursday, we had our Active Adult 9 Volunteer Luncheon as well, in which we had an \$800 10 donation again, this year, from Grove Foundation. Thank 11 you very much. They have done that in the past and most 12 of the Grove Foundation members were there, Kathy being 13 one of them. It was very nice to see them on site. 14 Upcoming Events, you have your list 15 there. Today actually we're having our Bunny Hop Easter 16 Egg Hunt as we speak. This evening we will have our 17 Flashlight Egg Hunt at Fisher Park. Luckily the weather 18 is somewhat decent for that. 19 April 26th, we have our Road Rally, which 20 is a captive event, with local park districts, and we 21 actually had to open that up as well to extend the 22 registration. So it's very positive. Last year that 23 event was flooded out, which was very disappointing. It 24 was nice to see that it came back with great momentum.</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">13</p> <p>1 Sometimes that can happen. It can really damper future 2 registration. We have our Kids Outdoor Flea Market, 3 which will be held at Matrix Park. 4 Moving on to Facilities, Fitness is 5 looking really good for the month of March. Really most 6 categories this month. Total membership, up. Monthly 7 Retention Rate is up from last year. Massage is up, 8 which is a good sign, and along with Total Usage being 9 up as well. Obviously Revenues is up, which is always a 10 good thing. Then our Year-To-Date Retention, if you 11 recall, which was down about ten percent, has now 12 regained. We're just shy of two percent from where we 13 were last year which, again, is a very, very good sign. 14 Total Membership Revenues is one balance 15 slide. Total Group Exercise Participation, which we 16 consistently are analyzing and looking at out at Lyman 17 Woods, we had a good strong month again with general 18 visits. Year-To-Date Visits Participation is up almost 19 600, and then again, the Downers Grove, I mentioned the 20 museum, was up this month as well. So that's pretty 21 much the Recreation Department Report. I will be happy 22 to answer any questions. 23 COMMISSIONER MAHONEY: I will just say both 24 the recognition events were great and it's unbelievable</p>	<p style="text-align: right;">15</p> <p>1 also on April 12th. 2 We partnered with a local gardener, 3 Nowicki, who has set up a seed library at Downers Grove 4 Museum. We actually had 60 people attend the first 5 orientation event and we have nearly 20 people signed up 6 for the second orientation event. The idea of the seed 7 library is to give everyone who becomes a member ailing 8 and rare seeds, plant them, grow them in the garden. 9 They bring some of the seeds back later in the season 10 basically to keep those ailing seeds surviving. It's a 11 great spot for the museum because fruits and vegetables 12 may be growing in Downers Grove over the last 100 13 years. It's the first one in the Chicagoland area, so 14 it's a nice program to have. 15 We are also partnering with Golfsmith in 16 Downers Grove and they are hosting a Demo Day at the 17 golf club on May 3rd. We are also hosting a Spring 18 Swing Scramble the same day. So that is promoting the 19 day and the stores. So not only the Downers Grove 20 stores, but the Schaumburg and Fox Valley locations. So 21 hopefully that will bring some new golfers to our golf 22 club in early May. 23 And as mentioned, we attended the Wedding 24 Walk that was organized by the downtown Downers Grove</p>
<p style="text-align: right;">14</p> <p>1 how many people participate with the Park District in 2 the community. I think that's really good. And also I 3 think Michelle is doing a really good job with the 4 Active Adult Center. 5 MR. KELLY: Thank you. 6 TREASURER MAHONEY: And so I think she gets 7 some kudos for that. 8 MR. KELLY: Thanks. I will pass that along to 9 her. Yeah, the golf course is actually -- We are 10 thinking that may be too small of a venue for a little 11 volunteer dinner. 12 TREASURER MAHONEY: It was a little crowded, 13 which is a good problem. 14 MR. KELLY: But thank you very much. 15 PRESIDENT CUSHING: Thanks, Jay. 16 EXECUTIVE DIRECTOR McADAM: For Marketing, we 17 will do the fancy typeset. 18 MR. EVERETT: Hi. The last few weeks has 19 been pretty busy. Alternative partnerships have 20 emerged. We partnered with the Village of Downers Grove 21 again for delivery of Spring Park Places, which is a 22 newsletter, partnering with them to help us reduce the 23 cost of delivery of that. Amicus, we partnered with 24 them with the Passport For Safety and Big Trucks Event</p>	<p style="text-align: right;">16</p> <p>1 Association. And in addition, we have we had staff from 2 Lyman Woods attending meetings for the Bookkeeper 3 Association for DuPage and Will County to promote Lyman 4 Woods. 5 We had our staff from the Fitness Center 6 attend a Health Care Act at Downers Grove North High 7 School. So, yeah, all great things there. 8 As Bill mentioned, kind of a big project 9 I am working on, is the new website, and that's on track 10 and I am very pleased with everything that they have 11 sent to the site so far. 12 Any questions? 13 MR. FYLE: Good evening. Over the last few 14 weeks we have been starting on design work for the 15 playground at Patriots Park. As you may remember, this 16 was planned for renovation this coming fall but we want 17 to get started on some of that planning and design 18 work. Now our anticipated schedule would be to come 19 back next month to request authorization to bid at the 20 May Board Meeting to bid in June, award a contract at 21 the July meeting so that then a contractor can order the 22 play equipment we need, at least a month for the 23 equipment to be fabricated and delivered then late 24 August. And then that renovation would take place in</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">17</p> <p>1 September. And we also have the dredging work that's 2 planned for Patriots Park. So that work, the dredging 3 contractor will be on site in August, early August of 4 the fishing derby. And so that work will start and then 5 soon afterward the playground work. So design work for 6 the playground is underway. 7 We have actually scheduled a neighborhood 8 meeting next Wednesday evening from 5:00 until 7:00 at 9 Patriots Park. At this time the weather looks 10 promising. They were originally calling for some rain, 11 but that's been pushed off to Thursday. We are hoping 12 we could have that at the playground, have exhibits out 13 for parents and kids to see, that we can talk to. An 14 alternate location would be at the Lincoln Center in 15 Room 503, but that's next, from 5:00 to 7:00. Letters 16 were mailed to all residents within 500 of the park. 17 Also, in addition to the playground 18 designs, we are planning to have at least one exhibit 19 that discusses the dredging projects. If there are 20 questions, we can talk about that as well. And then 21 also, our forester, Mike Stelter, on hand. We have a 22 couple of pretty good-sized ash trees at the playground 23 that will be coming out, some fairly large ones, right 24 as you come into the playground. Fortunately those are</p>	<p style="text-align: right;">19</p> <p>1 be reseeding the site. And with that, I will be happy 2 to answer any questions. 3 VICE PRESIDENT GELWICKS: What's the estimated 4 time for the tennis courts to be ready? 5 MR. FYLE: Tennis courts, they will be paving 6 those courts probably in the next -- within the next 7 couple of weeks and then the asphalt that they put down 8 needs to cure for a couple of weeks before they can put 9 the color coating on it. So if they pave it, you know, 10 say end of April, it will be mid April when they can get 11 in to do the color coating. I would say late April. 12 VICE PRESIDENT GELWICKS: You mean May? 13 MR. FYLE: I'm sorry, late may. So those 14 should be hopefully done June, beginning of June. The 15 color coating, he has to have, you know, the right 16 temperatures to put that down, so somewhat temperature 17 dependent, but hopefully by May. 18 VICE PRESIDENT GELWICKS: With the playground 19 renovation, I know you were limited in terms of who you 20 send the notices out to. I mean, do we have any 21 notification at the site that there is going to be a 22 meeting just because I think it's the people that go 23 there and the ones would be the most interested even 24 more so than neighbors.</p>
<p style="text-align: right;">18</p> <p>1 on the north side of the playground. They don't 2 actually provide shade directly onto the play 3 structure. We are not losing shade, but it will be a 4 big impact to lose those trees. We are hoping to be 5 able to answer questions about that and let people know 6 what's going to be happening with that. 7 Doerhoefer Park tennis court renovation 8 work is about to begin. The contractor -- we actually 9 took down notes this week -- the contractor sends 10 bidding in, he may be actually starting tomorrow taking 11 some of the fencing down and beginning work on the 12 courts next week. And the lighting work is also 13 scheduled. Tennis court lighting is scheduled for early 14 May, and Walnut Avenue grading is also under way. The 15 picnic shelter installation actually started first. 16 They started that last week and made pretty good 17 progress. That shelter is almost done, nearly 18 complete. They are finishing the work. They were 19 working on the roofing material today and the grading, 20 the earth work began yesterday. Even though we had rain 21 and snow earlier in the week, it dried out fairly 22 quickly and they were able to get in there and do quite 23 a bit of earth moving today. That work should -- the 24 earth work should take about three weeks and then will</p>	<p style="text-align: right;">20</p> <p>1 MR. FYLE: Sure. That's a good thought. We 2 don't have anything at the site now, so that's something 3 we can do. 4 PRESIDENT CUSHING: Can we put it on the 5 website as well? 6 MR. FYLE: Absolutely. We've got updates on 7 construction activity at Walnut and Doerhoefer tennis 8 courts to let people know that's closed. That's been 9 posted this week. We can get something on the 10 playground design as well. 11 VICE PRESIDENT GELWICKS: I usually know you 12 have a handful of people and it's real difficult to get 13 the real people. 14 MR. FYLE: Sometimes it depends where the park 15 is located. If we go 250 feet out -- this time we went 16 500 feet out knowing it's a more important park. We got 17 over 200 addresses that were mailed to. We have already 18 gotten some responses, e-mails. 19 VICE PRESIDENT GELWICKS: It's such an 20 active -- 21 MR. FYLE: Certainly putting something out in 22 the park is a good idea. 23 PRESIDENT CUSHING: Thanks, Paul. 24 Good evening.</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">21</p> <p>1 MR. PENMAN: Well, Staff is obviously getting 2 things ready, a month here, waiting for the weather to 3 get a bit better. The irrigander expander is back in at 4 Prince Pond. We are waiting on some parts for the one 5 for Barth Pond over at Patriots Park. Staff obviously 6 worked closely with Staff. The mini golf course is 7 ready to go on the Thorguard lightning detection. The 8 system is up and going as of the 1st of April, so those 9 were ready to go.</p> <p>10 I included in the report some final 11 numbers for ice rink usage over the last couple months. 12 Obviously the weather played a big part of that and 13 being able to have the rink over at McCollum seem to 14 work out even better than at Prince Pond. We did get 15 quite a bit of use over there as well.</p> <p>16 The snow removal, as of the writing of 17 this, we had 49 events. The other day we made it 50 for 18 the year. So 50 snow events and probably close to 20 -- 19 or, excuse me, 84 inches of snow. So our staff has been 20 very busy with that.</p> <p>21 Horticulture staff is looking to spring. 22 They have been -- all the park staff transplanted some 23 shrubs at Washington Playground around the shelter area 24 and moved those around to improve maintenance and</p>	<p style="text-align: right;">23</p> <p>1 you about what he does and some of the accomplishments 2 we have had in that area in the past year. So very 3 good. Actually I would take any questions.</p> <p>4 COMMISSIONER SOUTER: Actually I've got a 5 question about Hummer Park skating. Obviously it didn't 6 officially open. I can't comment to seeing people 7 skating there anyway. But I guess what are your 8 thoughts at this point in terms of opening that up for 9 next year? Is it worth it?</p> <p>10 MR. PENMAN: Part of the issue we have over 11 there is just with the water that runs through there, we 12 think it's just got too much salt on it and it doesn't 13 actually freeze to the depth that we need it to. 14 Between the fact that it's moving water and the salt 15 content, it just does not freeze to the depth of eight 16 inches, which is what, you know, PDRMA, which is our 17 risk management agency, recommends for us. So eight 18 inches of ice, when that's there, that's when we say 19 it's open and safe to skate on. It's something we want 20 to continue to look at and see if there is anything we 21 can do. There are some deep spots in there that have 22 eroded over time. You get water that flows underneath 23 there and that just eats away at it. It just doesn't 24 allow for it to freeze as well as we would like. So it</p>
<p style="text-align: right;">22</p> <p>1 adjusted the design a little bit to accommodate growing 2 conditions. You know, also getting some of those shrubs 3 and flower beds ready to go.</p> <p>4 Over at the golf course, I was lucky 5 enough to get out with Jeff Pozen last week and get a 6 look at some of the greens and grass and everything. We 7 did have some cross country ski damage out there this 8 year just because of the amount of snow we had. When it 9 was compressed, it obviously froze and killed some of 10 the grass, but it will be back here in a week or so. It 11 was a little patchy and it's already looking better 12 now.</p> <p>13 The rough mower, we've got a bid opening 14 for that on April 30th and we will be bringing that to 15 the second meeting in May. I know the golf course staff 16 has been out doing a lot of aerating on the greens and 17 the tees. They were able to actually get out on the 18 greens yesterday with the aerator. So I would answer 19 any questions, but actually we've got Mike Stelter here 20 tonight. He is going to do a quick presentation about 21 the middle two pages of the report here and kind of some 22 of the stuff he does as our forester. We are very lucky 23 to have Mike. I thought tonight would be a great 24 opportunity for him to kind of share a little bit with</p>	<p style="text-align: right;">24</p> <p>1 is something we are continuing to look at. We will try 2 to get it next year. It's one of those things that if 3 you know, maybe we can do some grading in there that may 4 help the situation. We found even this year with as 5 cold as it was, to get that eight inches is very 6 difficult.</p> <p>7 COMMISSIONER SOUTER: Thank you. 8 MR. PENMAN: I am going to turn it over to 9 Mike then. Let him go. Thank you again.</p> <p>10 FORESTER STELTER: Good evening. I appreciate 11 to come and talk to you. I know most of the new faces I 12 haven't had the opportunity to meet. I will do that 13 after the meeting tonight.</p> <p>14 Just to start out, we wanted to do a 15 quick update for you on some of projects we have been 16 looking at, some of the things that are going to be 17 upcoming here in the next couple of weeks. Since this 18 is part of the whole Arbor Day celebration, we do this 19 in cooperation with the Morton Arboretum. You have 20 probably seen that's downtown. Downers Grove, what it 21 is, that is a tag that basically describes the 22 contribution of the tree to the site, the actual 23 quantifying values, dollars, pounds, that type of 24 thing. Trees are measured at diameter, height, the</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">25</p> <p>1 species of the tree is put in and basically gives you a 2 value back for different things that it contributes, 3 stormwater abatement, which is the interception of 4 rainfall, increasing property values. There is a 5 certain dollar value that comes with having mature 6 plants on site. Energy savings, when they are planted 7 in the right place, it will add to savings with heating 8 and air conditioning, air quality intercepting and 9 sequestering carbon dioxide within the stems to take out 10 some of that material. 11 VICE PRESIDENT GELWICKS: Mike, is there a 12 database of that information? 13 FORESTER STELTER: Yes. The annual tree 14 contributions are calculated by the use of the National 15 Tree Benefit calculator. If you Google that, you can do 16 it, or anything on your property, if you can measure the 17 diameter and know that. It was developed by the 18 National Arboretum and Navy. 19 VICE PRESIDENT GELWICKS: We have a database 20 of our trees? 21 FORESTER STELTER: We have a basic inventory, 22 yes. 23 VICE PRESIDENT GELWICKS: Do we have this data 24 for all those trees then so we know aggregate?</p>	<p style="text-align: right;">27</p> <p>1 VICE PRESIDENG GELWICKS: Do our preschool 2 kids get them? 3 FORESTER STELTER: Yeah, we did some things 4 with the preschool in the past, but I think there were 5 some objections as far as seedling giveaways and that 6 type of thing. I would love to be able to get in and 7 talk to them again. I mean, you know, that's kind of 8 the people that you want to get going with this. You 9 want to get their interest to keep them going all the 10 way through tree planting. Just kind of an update that 11 we wanted to let you guys know. 12 Well, for this current fiscal year the 13 plan was to plant 50 trees. As of Arbor Day, we will 14 have installed 48 new trees to take the place of things 15 we have had to take out because of Arbor and natural 16 attrition throughout, you know, the cycle of things as 17 we lose things in the parks. We have 11 more planned 18 for May coming from another nursery. So we will be at 19 60 trees for this coming -- for this past fiscal year 20 which kind of surpasses our goal. And as stated up 21 there, Arbor really kind of drives the whole thing. 22 There is going to be a lot of open planting spaces. It 23 doesn't necessarily mean that every space will get a 24 tree. We will evaluate that as we go just to make sure</p>
<p style="text-align: right;">26</p> <p>1 FORESTER STELTER: We can figure that out, 2 yeah. It will just take updating it. It's been a few 3 years since actual diameters have been taken and that 4 type of thing. We can figure out a rough value for it. 5 VICE PRESIDENT GELWICKS: Just a curiosity. 6 FORESTER STELTER: Yep. No problem. Like I 7 said, you know if you did go and Google the National 8 Tree Benefit calculator, you can figure all that out for 9 what it's adding to your particular house as well. 10 So Arbor Day this year will be at Randall 11 Park this coming Friday, 12:30. If anyone is interested 12 in attending, you are welcome to come out. We will be 13 planting a couple trees with first-graders. We have a 14 couple trees already tagged and selected. We have tree 15 seedlings that will be distributed at the Rec Center, 16 first come, first serve. We will have 300 out there. 17 We will have 100 to give to each of the first-graders 18 that are going to be helping us out there later, too, 19 and passing around -- this is a T-shirt. We tried 20 something new this year. Ian developed the logo for 21 it. We would like to give them away to all of them so 22 they wear them around town and maybe they share a little 23 bit more interest within the school and even within 24 town, too.</p>	<p style="text-align: right;">28</p> <p>1 that it doesn't interfere with the recreational views or 2 anything like that, just so we are using everything 3 properly. I worked with Paul quite a bit on that. 4 Our goal for the upcoming budget here is 5 60 trees. Again, we will pull some of that money out of 6 our replacement planting money and memorial trees, 7 Emerald, Arbor. Again, it's the big thing right now. 8 You know, it's going to be around for the next couple 9 five, six years. It's really going to be influencing 10 forestry in the Chicago area. 11 Open planting spaces, it's going to 12 actually help us in a couple ways. We will be able to 13 increase species diversity rather than have a ten-pallet 14 of genuses and species we have been using. If we can 15 really spread that out, it really limits our 16 susceptibility to pests and stuff that come through and 17 as well it helps to rejuvenate the population a little 18 bit, too. We get younger trees coming up so we have an 19 all age type of forest rather than everything old or, 20 you know, kind of the lumping going over the top. 21 Once of the programs that we did this 22 year was with the SEASPAR Eagles. We kind of were 23 kicking that around that we needed to maybe try to see 24 if we can get them involved. We talked to Susan and she</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">29</p> <p>1 was very receptive to the idea of having the Eagles come 2 out and help us. We kind of figured what they might be 3 able to do. Mulching tended to be the best thing, 4 picking up sticks and that type of thing. They enjoyed 5 being out in the parks and they really did a lot for 6 us. They were at McCollum, they were at Hummer, they 7 were at Whitlock and they were at Mar-Duke. So all in 8 all we probably provided them a couple loads of mulch 9 twice a week. They wheelbarrowed it out and mulched 10 trees in the parks. And as a result, they were 11 recipients of our Volunteer of the Year Award for 12 Parks. And as you can see, they spent 260 hours out in 13 the parks. And, you know, at first it was a little bit 14 tough getting them to really go with it. But between 15 myself and the other two fellows that I had working 16 seasonally for me, this was one of the highlights of our 17 day, was to go out and talk to them. One of them always 18 had a joke. They were always goofing around and having 19 a good time and it actually helped them, too, because 20 they are building skills they can use if they go to say 21 Jewel or the hardware store to apply for a job that, you 22 know, they are developing some of those skills and 23 following instructions and that type of thing so that 24 they can move on and get better. I do also work with</p>	<p style="text-align: right;">31</p> <p>1 management, kind of go through this kind of quick. It's 2 an important component of what we do forestry-wise, 3 whether it's at the golf course or whether it's the 4 natural areas in the parks as well invasive plants, 5 things that are not native. And when they do get 6 introduced into it, it usually causes a decline in the 7 health of the ecosystem and there is a lot of different 8 ways to do that economically and environmentally and 9 public health.</p> <p>10 Economic value, when things grow in, 11 there is loss of recreational value. When you're in the 12 woods and can't see anything, it's not as much fun. So 13 we have been working on that to, you know, take that 14 step out at Lyman Woods and up at Belmont Prairie and 15 some of our other park sites as well. You know, 16 obviously you can see the economic ramifications, too. 17 It can be \$3,000 or \$5,000 an acre to take this stuff 18 out and get it done the right way. You know, once it's 19 done, we prefer to get it out of the way and not have to 20 keep going back and do it again. Obviously herbaceous 21 species like garlic mustard and Japanese knotweed that 22 are present in a lot of places, we've got mustard 23 everywhere, Japanese knotweed. There is another one 24 that said to be between \$500 to \$800 an acre, kind of</p>
<p style="text-align: right;">30</p> <p>1 Shannon as far as natural areas between infrastructure 2 improvements and things like that.</p> <p>3 This was one of the trails that washed 4 out last year in the flood in April. We refurbished a 5 bunch material we had in our yard, turf blocks and 6 gravel, and we found an Eagle Scout that was willing to 7 take on this project. And as a result that trail is now 8 pretty stable and working out pretty good. I was out 9 there this spring and we didn't have any erosion or loss 10 on that. So I think this might be a way that we go in a 11 lot of places where we have trails.</p> <p>12 Project Learning Tree is another program 13 that we are kind of starting in. I felt it might be a 14 good step, at least for myself in a forestry capacity, 15 that if we're going to be doing more outreach to kids in 16 the grade schools, preschools, high schools, as well as 17 scout groups, special recreation groups, and I even had 18 some outreach with some of the retirement homes in town, 19 too, was to go through this program, which is basically 20 an educational program. It gives you lessons plans. It 21 kind of teaches you to be less of a scientist, to talk 22 more plainly, you know, to make things more accessible 23 for people to understand what we are doing with trees 24 and nature and that type of thing, invasive species</p>	<p style="text-align: right;">32</p> <p>1 expensive. We don't want to be spending a lot of money 2 on that type of thing. We prefer to figure out how to 3 get rid of it and do it in a fiscally responsible way.</p> <p>4 Environmental diversity changes, those 5 changes tend to be very vigorous and they also put out 6 chemicals that prevent other plants from germinating and 7 living underneath them. A good example is a wetland. 8 You see it in the ditch all the time. It's got the real 9 long fluffy ends on it. It spreads and it keeps 10 everything out. Same thing with Japanese knotweed. It 11 puts out chemicals from its root system. It basically 12 keeps other plants from growing underneath it and then 13 we have soil loss after that.</p> <p>14 Human health, there are certain species 15 that we deal with. Giant hogweed is one of them up at 16 Lyman Woods. We did have that this past year. That's 17 one that if people actually run into it, the sap from it 18 will cause blistering and dermatitis and it's not a good 19 thing. We have been trying to make sure we keep an eye 20 on when that pops up and keep that out of there as well 21 this Japanese knotweed occurs along streams, a big kind 22 of tall looking plant. It can be six to nine feet tall, 23 can have big heart-shaped leaves about the size of a 24 12-inch softball, and it also has the white flowers on</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">33</p> <p>1 the end. So we have been doing chemical controls on 2 that. And the St. Joe's Water Shed, where our parks are 3 and stuff, we've got it under control pretty good. The 4 only problem is that it's such a patch work along there 5 with the woods and other residential areas and stuff. 6 We can take care of ours, but if something comes 7 downstream from them, we are going to end up with it 8 again. So we just try to be good stewards and take care 9 of ours. Again, like I said, this is one of those ones 10 that you can see through. You know, it's going to be 11 this tall and you try walking through it, you can't walk 12 through it. You can see through it. So there is lost 13 opportunities there. Buckthorn, everybody knows about. 14 I don't really think I need to expound on that one. 15 Garlic mustard is something prevalent up in the oak 16 woods at Lyman Woods. You see it in large areas 17 everywhere. We have been spraying this for a while, 18 too. Most of our stuff looks pretty good. But again, 19 this one is a biannual. It shows up twice. One time 20 it's a small rosette, but then it puts out those flowers 21 and it has a long siliqua, which is the seed pod, and 22 puts out 500 seeds per plant. So it's one of those 23 survival things, that it really thrives when it does get 24 going.</p>	<p style="text-align: right;">35</p> <p>1 it worked pretty well. It may be something that we 2 could look into here in the next couple of years and 3 couple of park paragraphs cells, if everyone is 4 agreeable to that whole idea. More to be found out and 5 discovered and discussed, that type of thing. 6 This is just some of the different pests 7 that we have been dealing with this past winter, voles, 8 on the upper left, beavers, Geoff Penman. And some of 9 the damage down below, the first one is voles. We have 10 seen a lot of different things this winter with winter 11 damage on plants, drying on Evergreens, and the 12 brownings and that type of thing. But this is a lot of 13 the damage that was underneath the snow cover. Voles 14 will stay underneath there. And let's see if I did this 15 right. Which one is the pointer? These are the little 16 trails that they leave underneath the snow. And 17 basically they are just moving back and forth, so there 18 is turf damage involved. This is chewing the base of 19 trees that girdles the tree in that particular spot. So 20 nothing can move up and down. There is also some rabbit 21 stuff here and little bit of rabbit damage there, too. 22 So, you know, a lot of the damage, you know, you have 23 seen it above ground, but a lot of the stuff is down at 24 ground level as well, too. This seems to be one of our</p>
<p style="text-align: right;">34</p> <p>1 This is the Honeysuckle. It kind of goes 2 in cooperation with Buckthorn. Usually you see both of 3 those in the same place taking up the understory in 4 wooded areas. I just thought it was kind of appropriate 5 that it's the plant on the Illinois Invasive Species 6 advertisement that's next month. So there is a bunch of 7 different events going on, garlic mustard poles and 8 brush cutting, that type of thing. I think we actually 9 have a couple of workdays scheduled in the natural areas 10 during that time. Some of the methods that we use for 11 management of these we have described far on the left. 12 It's just one of the tools. None of these are actually 13 like the panacea that's going to get rid of everything 14 completely. But if you use things together, as you 15 know, just a separate part of your toolbox, you can have 16 better results that way. 17 Down in the lower right corner, it's 18 people doing physical removal and actually use chemical 19 spraying as well. So we have fire, we have cutting, we 20 have mowing, we have chemical applications. And another 21 newer one that we have seen in the Midwest, mostly in 22 Southern Wisconsin right now, is using goats. Knock 23 Knowles Park out in Naperville used them on a five-acre 24 patch by their new interpretive center. It looks like</p>	<p style="text-align: right;">36</p> <p>1 most current topics right now. It's beavers up at Lyman 2 Woods. The beaver population rebounded last year. They 3 became reestablished in the central wetland. They moved 4 down from the Good Sam Retention Pond, which is where 5 they got started this last time. Apparently that seemed 6 to be the most secure place for them to live because it 7 was constant water level. So they started up there. 8 They then moved down last spring into the central 9 wetland. We discovered one relatively close to the 10 trail. We then found another one this winter when we 11 were out around farther back up into the wetland. We 12 have beavers in there. I don't know if that's enough to 13 support them, all of them. You know, hopefully some 14 move along. But, you know, there is potential for a lot 15 of damage there mainly because usually they mate. There 16 is a male and female and then their offspring. Usually 17 the offspring is three to four. So at that point, if 18 you figure there is some living in each one of those and 19 they are all fully populated, there is 15 beavers out 20 there doing their damage. 21 I mean, there is negative impacts and 22 then there is also some positives, too. The negatives 23 are flooding of the trails. Basically it's impassable 24 down by the bridge. There is tree damage. We will have</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">37</p> <p>1 some pictures of that coming up. When they start 2 hitting mature oaks or oak regeneration, also possible 3 flooding upstream, we have had some inquiries from 4 Midwest University when the water goes up what's going 5 on down below, have to go out and stuff, tearing stuff 6 apart.</p> <p>7 The positive impacts are the fact there 8 is more open water out there which then kind of brings 9 in a whole different population of wildlife I guess is 10 the best way to describe it. There is a lot of muskrats 11 out there right now. I think with the open water we 12 might end up seeing more of the herons come back again. 13 At one time, back in the '90s, there were herons that 14 were nesting on the north side of the wetland because of 15 the open water. That possibly might come back again, 16 too.</p> <p>17 This one here, you can see the damage 18 here. These are on trees that are on Midwest University 19 property. This is an oak. It's about 20 something 20 inches in diameter. They have crewed here and all the 21 way around here. So half of that tree has lost its 22 capacities to move material up and down. This is just 23 another picture. It kind of represents what's going on 24 by the retention pond. A newer box elder that sprung on</p>	<p style="text-align: right;">39</p> <p>1 that. They don't know property lines. They are just 2 going to keep moving where they feel comfortable and 3 unfortunately we're monitoring it. It doesn't matter if 4 they are more than 50 feet away from their comfort zone 5 at the retention pond. Most of the good oak woods at 6 Lyman Woods is farther away than that, but you never 7 know what they are going to do. And this is the other 8 lodge that we found back up there.</p> <p>9 VICE PRESIDENT GELWICKS: Can you fence around 10 it to keep them out?</p> <p>11 FORESTER STELTER: Well, you can, but you 12 don't know which ones they are going to pick, you know, 13 and there is a lot of trees up there. It's really hard 14 to --</p> <p>15 VICE PRESIDENT GELWICKS: They don't climb. 16 FORESTER STELTER: No, they don't, but they 17 can reach up this tall. They are pretty big animals, 18 and if you have snow pack on top of it, but, yeah. We 19 have discussed can we put chain link fence around them 20 like they do across the way at the one subdivision on 21 35th Street. Well, when the smaller trees like this 22 have a pretty good grasp on where they are, and you only 23 have a few, that is one thing. But given the number 24 there, it's really, really difficult. This is one of</p>
<p style="text-align: right;">38</p> <p>1 it after it was constructed, almost every single box 2 elder as well. Pretty much marred everything down. 3 Then down here, this is the bridge going through and 4 we're looking south. You can see the water tower right 5 there and this is the dam they have constructed on this 6 side of the bridge to hold the water back. Again, there 7 is the damage, holding back this pool of water. And the 8 problem with this pool right here where the depth of it 9 isn't very deep, and it's about two foot right there, 10 and it has kind of led to some problems for us as far as 11 management. There is a couple different ways of doing 12 things, putting in pipes and that type of thing. With 13 the pipes, they are usually asking to have a minimum 14 depth of three feet so that you can put a cage around 15 the pipe, but we don't have that. It's something we 16 have been experimenting with. That will be probably in 17 the next slide or so, I think. Forgive me. I usually 18 run a chain saw, not a Hewlett Packard.</p> <p>19 This is another tree up at Lyman, which 20 it's different from the one we showed before. They are 21 chewing and chewing and chewing. They have cut down a 22 lot of smaller oaks in the 10- to 12-inch range on 23 hospital property, but it's like a lot of things, like 24 invasive species and other -- coyotes and things like</p>	<p style="text-align: right;">40</p> <p>1 the beaver pipes that I was talking about. We did put 2 one in and really that's only about a foot above the 3 bottom of the pond right there. What it is is it's a 4 length of pipe that we installed through the dam and 5 this has numerous holes in it and an open end on it so 6 that we can move water into it and try to do it 7 relatively quietly with holes and stuff far enough away 8 from the dam. Usually the trickling of the water is 9 what triggers them to come in. Last year we came in and 10 we notched here and we notched here to try to keep the 11 water levels down. Well, again, that night it would be 12 right back and we had to fix what we had just taken 13 out. We spent a lot of time out there. So we have 14 figured we would try a pipe this spring just to see how 15 it worked. Obviously we need to experiment with the 16 cage around it as far as how big it can be, how can we 17 secure it, how can we keep it going so that they don't 18 plug it up and, you know, pack mud into everything. 19 This is part of the water level management that we are 20 doing, you know, a trial pipe is put in. We spent about 21 240 man-hours last year working on that. I would like 22 to use it for other things instead of tearing out the 23 beaver dam every week, you know, if we did get the thing 24 working with the pipe. And Shannon has a contact who is</p>

Downers Grove Park District
April 17, 2014

<p style="text-align: right;">41</p> <p>1 a wildlife biologist up at O'Hare Field. They deal with 2 beavers on the airport property. We are going to see 3 what he has to say. Hopefully he can give us some 4 information as well. And this is probably the being of 5 my existence right now. Emerald Arbor and all of our 6 forestry in the last 30 years or so, we found a tree 7 that really worked really well and we planted the heck 8 out of it and kind of came back to get us. Just like 9 Dutch Elm disease came back in the '50s and '60s, after 10 that, honey locust went. Well, we will put in green ash 11 and see how that works. It worked really good, but 12 that's everywhere. We are fortunate that I think only 13 like ten percent of our total tree population is ash 14 trees, white, green, blue. A lot of places are up 15 around 20 percent. So these are just some pictures. 16 Arbor in the larval stage. We have found these inside 17 the trees. These you hardly ever see. I don't know 18 where they go and what happens to them, but they seem to 19 just disappear. You never ever see them, but you see 20 the damage which is left behind, which is all of these 21 galleries. Basically what happens is these galleries go 22 all over the place like this. A lot of insects will do 23 like a straight gallery, but this one is circling and 24 winds. It cuts off so much candidum underneath, which</p>	<p style="text-align: right;">43</p> <p>1 loses materials for the tree. 2 Just kind of background on our ash 3 population, we've got about 600 ash trees in landscape 4 situations. Wooded areas, obviously it's a little more 5 difficult to have a count on those and it also is more 6 difficult to manage those. We stick mainly to the 7 landscape population of ash trees. It's about ten 8 percent of our total. Removals are done when trees have 9 declined to the point where they are not going to 10 contribute anything back into the landscape. During the 11 year, we try to take those out before we have any 12 failure with branch drop or anything like that. This 13 past year, fiscal year, we are going to get 14 approximately 450 trees treated. Like I said, we do the 15 soil drench around smaller trees and we do the trunk 16 injection on the larger trees that are in more prominent 17 places, like around the football field at Doerhoefer, 18 south end of Memorial Baseball Field to help with 19 baseballs going out in the field, provide some shade for 20 people and stuff like that. And the other thing as part 21 of our management is just observation. Ash trees kind 22 of move to the top of the list when we're out in the 23 parks just to kind of take a look at them, see what the 24 tops look like to make sure there is no damage. Also we</p>
<p style="text-align: right;">42</p> <p>1 is the tissue that transports material up and down the 2 tree. One good sign to tell you, if a tree is Emerald 3 Arbor remember to look for the woodpecker damage. We 4 had some slides -- I think Geoff put in an earlier 5 packet -- of trees at McCollum that were basically 6 shredded. You could see the smaller holes here and 7 there, but they pulled the bark off looking for the 8 larvae and that's a dead giveaway that that tree problem 9 has to go. We have been doing a lot of chemical 10 management for it. 11 Up here, this is a soil drench around the 12 base of the trees. Some places you have to do an actual 13 manual injection of the same material. Another thing 14 that we might try in some places where we have 15 difficulty with uptake is a trunk spray. As long as 16 that is dry before anybody gets into the area, it's 17 supposed to be safe. We will see how that goes. We 18 might try just a little bit in some remote areas first. 19 And this is kind of the preferred method on larger 20 trees. It's called a trunk injection. Basically there 21 is holes with little ports at each of these, chemical 22 goes in here, this is pressurized and then pushed into 23 the tree. It has to be done when the tree is about 24 three-quarter leaf so that the draw up in translocation</p>	<p style="text-align: right;">44</p> <p>1 do a pretty good observation when we do the treatment, 2 which is annually, for the basic application in the 3 soil, and biannually for the trunk injection. 4 For this coming year removals will 5 continue. You know, we're doing pretty good as far as 6 controlling the decline of the trees. That's part of 7 the application. It's not that we are going to save 8 everything, but we can maybe save a good chunk of the 9 population, but also then just kind of control when we 10 lose the rest of them, instead of having everything hit 11 at one time, we kind of control it so that we can manage 12 it financially and manpower-wise, too. 13 One of the big things -- one of the 14 bigger things we are talking about this year is we would 15 like to propose a computerized tree inventory in the 16 budget for this upcoming year. We would collect 17 information with GPS data collectors and then go into 18 our computers, give us exact locations of them, 19 information about the trees, species, diameter, 20 condition, and all that would go in. It would also help 21 us then create an updated management plan and ash 22 management plan as well and help us create a schedule 23 for future maintenance as well, things we are going to 24 have to do.</p>

Downers Grove Park District
April 17, 2014

45	1 VICE PRESIDENT GELWICKS: Doesn't the Village 2 have a similar system? 3 FORESTER STELTER: The Village, I talked to 4 them as far as how they were doing things, and I don't 5 know that it's quite late into the GIS or as detailed as 6 we would like it to be. I think when they did it 7 initially they had somebody go out with a quick locator 8 and then they came back with data collection later. 9 Whereas now you can go out with the hand-held unit and 10 do your location, submeter location so it's within 39 11 inches and add all your information, sink it into the 12 computer, and then it's a one-step thing inside instead 13 of going out, collecting, having to enter it into the 14 computer and stuff. 15 VICE PRESIDENT GELWICKS: I do believe if you 16 have trees in a parkway, you can -- that are out there, 17 you can find what's on your property through their 18 system. 19 FORESTER STELTER: Yeah. 20 VICE PRESIDENT GELWICKS: And basically I 21 think I through the anchor out, but Geoff invited me to 22 come speak to you. I really wanted to take the 23 opportunity to talk to you. So if you have any 24 questions, either tonight or at any time, feel free to	47	1 Executive Session? 2 SECRETARY ROMAN: Move to adjourn to Executive 3 Session as per the items in the Agenda. 4 VICE PRESIDENT GELWICKS: Second. 5 PRESIDENT CUSHING: Roll call, please? 6 MS. RANK: Mr. Roman? 7 SECRETARY ROMAN: Aye. 8 MS. RANK: Mr. Gelwicks? 9 VICE PRESIDENT GELWICKS: Aye. 10 MS. RANK: Mr. Cushing? 11 PRESIDENT CUSHING: Aye. 12 MS. RANK: Ms. Mahoney? 13 TREASURER MAHONEY: Aye. 14 MS. RANK: Ms. Souter? 15 COMMISSIONER SOUTER: Aye. 16 PRESIDENT CUSHING: Motion approved. We are 17 adjourned. 18 (Executive Session.) 19 COMMISSIONER MAHONEY: I make a motion to 20 Final Adjournment. 21 COMMISSIONER SOUTER: Second. 22 PRESIDENT CUSHING: Roll call, please? 23 MS. RANK: Commissioner Mahoney? 24 TREASURER MAHONEY: Aye.
46	1 e-mail or call me or anything like that. 2 VICE PRESIDENT GELWICKS: Very good. 3 TREASURER MAHONEY: Thank you. 4 THE HEARING OFFICER: Appreciate it. 5 PRESIDENT CUSHING: SEASPAR? 6 EXECUTIVE DIRECTOR McADAM: SEASPAR Meeting 7 this week, the Board passed the budget, which is in your 8 packet with you tonight as well for your review, and 9 also in your packet, both on the sheet with the upcoming 10 events as well as an invitation, is an invitation to the 11 Board for the grand opening. 12 PRESIDENT CUSHING: All right. That's all the 13 Staff and Committee Reports. We are on to Unfinished 14 Business? Any Unfinished Business? 15 EXECUTIVE DIRECTOR McADAM: We do not. 16 PRESIDENT CUSHING: How about any business? 17 EXECUTIVE DIRECTOR McADAM: No. 18 PRESIDENT CUSHING: All right. At this point 19 we have another opportunity for visitors to address the 20 Board. Are there any visitors? Not seeing any, I would 21 like to announce first that the next Board Meeting will 22 be a Workshop held May 1, 2014 at the golf course. So 23 everybody is welcome to attend that. We do have 24 Executive Session. Make a motion to adjourn to	48	1 MS. RANK: Commissioner Souter? 2 COMMISSIONER SOUTER: Aye. 3 MS. RANK: Commissioner Cushing? 4 PRESIDENT CUSHING: Aye. 5 MS. RANK: Commissioner Gelwicks? 6 VICE PRESIDENT GELWICKS: Aye. 7 MS. RANK: Commissioner Roman? 8 SECRETARY ROMAN: Aye. 9 PRESIDENT CUSHING: Nays, none. Absent, none. 10 Motion carried. 11 12 (Which were all the proceedings 13 had.) 14 15 16 17 18 19 20 21 22 23 24
